GARZETTA FREE-STANDING BASIN INSTALLATION GUIDE:

1. Prior to installation remove the basin from carton and inspect for transport damages to the basin.
2. Position the basin on the counter-top.
3. Mark out the waste outlet on the counter-top.
4. Cut the required shape as marked.
5. Install waste to the basin.
6. Install the tap-ware to the basin, referring to the tap-ware's individual installation instructions.
7. Place the basin in the cut-out and fix using mildew resistant, silicon of an approved type. Clean away excess silicon from around the basin.
8. Connect the tap-ware to the service outlet and the waste to the trap outlet.

AVAILABLE COLOURS:

The Garzetta free-standing basin, is SABS approved and has a 10-year product warranty and offers a service to all clients for any factory-faulted items. The pieces are high-pressure cast, which yield more uniform and consistent pieces. The waste of the basin is 45 mm. The piece has reduced carbon footprint if sold in South Africa as it is manufactured in the country. This will also ensure that all queries are resolved promptly and there is a continuity of supply. The basin is installed easily, but we do recommend that you get help from a certified plumber.
